Education

· Sunbeam Institute of Information Technology	2026
Post Graduate Certificate Programme in Advanced Computing(PG-CPAC)	Percentage: 70.83
· Modern Education Society's College Of Engineering, Pune	2017
Bachelor of Engineering in Electronics and Telecommunication Engineering	Percentage: 64.67
· Dayanand Science College Latur	2013
Maharashtra State Board Class XII	Percentage: 69.83
· Shri Bankatlal Lahoti English School	2011
Maharashtra State Board Class X	Percentage: 94.91

Work Experience

- Searce Inc (*Analyst*) **March 2018 – June 2018**
 - Performed shipment performance analysis to monitor on-time delivery and ensure SLA compliance.
 - Collaborated with cross-functional teams to achieve business objectives and improve operational efficiency.
 - Developed and maintained excellent customer service to internal and external customers.

Projects

- **Bus Booking System**
React.js | Spring Boot | Java | MySQL | REST APIs | HTML | CSS | Bootstrap | Git | GitHub
 - Developed a **Bus Booking System** using **React.js, Spring Boot, and MySQL**, enabling users to search buses, book tickets, and manage reservations.
 - Implemented features such as **user authentication, seat selection, route management, package booking, and booking history** with secure backend APIs.
 - Designed a responsive and user-friendly interface with efficient database integration, ensuring seamless booking and real-time data management.
- **Mini Task Planner**
ASP.NET Core MVC | C# | Entity Framework Core | SQL Server | HTML | CSS | Bootstrap | Git | GitHub
 - Developed a **Mini Task Planner** web application using **ASP.NET Core MVC, C#, Entity Framework Core, and SQL Server** to manage daily tasks efficiently.
 - Implemented complete **CRUD operations** with a clean MVC architecture, enabling users to create, update, delete, and track tasks.
 - Designed a responsive user interface using Razor Views, HTML, CSS, and Bootstrap for efficient task management.
- **Electronic Key Management System**
Embedded Systems | Microcontroller (Arduino/8051) | RFID | Electronic Lock | Sensors | C Programming
 - Designed and developed an **Electronic Key Management System** to securely store, monitor, and control access to physical keys using embedded electronics.
 - Integrated **RFID authentication, microcontroller-based control, and electronic locking mechanisms** to enable authorized access and improve key security.
 - Implemented real-time key tracking, access logging, and automated key management, reducing the risk of unauthorized access and misplaced keys.

Technical Skills & Interests

Languages: C++, C#, C, SQL, Python, Java, HTML/CSS, JavaScript
Frameworks: ASP.NET Core MVC, Spring Boot, Entity Framework Core
Databases: MySQL, MongoDB
Skills: Data Structures, Algorithms, OOPs
Tools: VS Code, Visual Studio, Sts EE, Excel, Git, GitHub

Related Coursework

Data Structures & Algorithms, Object-Oriented Programming, Database Technologies, Operating Systems, Computer Networks, Web Programming Technologies, Microsoft .NET Technologies, Java Technologies, Software Development Methodologies, Software Project.
